

# Diaper Service Math

Your order is based on the number of diapers you ORDER *not* the number you USE.

SUPPOSE AN ORDER WAS PLACED FOR 70 DIAPERS PER WEEK...

{ Mrs. Mom }

I want 70 diapers a week please.

Yes Mrs. Mom 70 diapers a week, Thank You.

We immediately set aside a 2-week supply for Mrs. Mom.

2-WEEK SUPPLY OR

$$70 + 70 = 140 \text{ DIAPERS}$$

FIRST WEEK

Thank You!

Mrs. Mom, here is your first delivery of 70 diapers.

Still in plant-held for Mrs. Mom.

$$70 + 70 = 140 \text{ DIAPERS}$$

SECOND WEEK

Mrs. Mom still has 10 clean diapers left over.

I'm returning 60 soiled diapers.

Here's your delivery of 70 diapers.

$$10 + 60 + 70 = 140 \text{ DIAPERS}$$

THIRD WEEK

Mrs. Mom still has 15 clean diapers left over.

I have a stockpile, please deliver 60 this week.

Here's your delivery of 60 diapers.

$$15 + 65 + 60 = 140 \text{ DIAPERS}$$

So remember, the diapers you have on hand, **plus** the soiled diapers you return, **plus** the clean diapers being delivered will always equal twice the number of your weekly order.

Your charge is based on the inventory levels that you are maintaining. If you regularly have extra diapers left over each week and would like to drop to a lower inventory level to reduce your order and cost, please email or call us **at least two business days in advance**.

PLEASE NOTE: If you are simply requesting a one week delivery adjustment due to an in-home stockpile, your rate remains the same. Please order in multiples of 10 diapers.
